AB - J04229602 Thin sheet form rare earth-transition metal permanent magnet is made by carrying powder contg. an intermetallic cpd. phase of RE2TM14B, as a main component (RE = one or more of Y, Sc, and lanthanide, TM = one or more of Fe, Co, and Ni), and molten drops comprising mainly RE and TM, with inert gas, towards a substrate, to mixingly deposit them on the substrate.

- USE - Used for making permanent magnets of good magnetic characteristics, and corrosion resistance in simple method, and low cost(Dwg.0/0)

IW - THIN SHEET FORM RARE EARTH TRANSITION METAL PERMANENT MAGNET  
MANUFACTURE PREPARATION CARRY RARE EARTH TRANSITION METAL BORIDE  
MOLTEN DROP GAS DEPOSIT SUBSTRATE

IKW - THIN SHEET FORM RARE EARTH TRANSITION METAL PERMANENT MAGNET  
MANUFACTURE PREPARATION CARRY RARE EARTH TRANSITION METAL BORIDE  
MOLTEN DROP GAS DEPOSIT SUBSTRATE
